Hydro water pump

Different pumps for 9kW and 16kW

Flow rates and pressures for pumps nominal are:

9kW: GRUNDFOS UPM3 25-75

26 L/min (minimum 7 for flow switch)

43kPa ESP

16kW: WILO STRATOS PARA 25/1-9

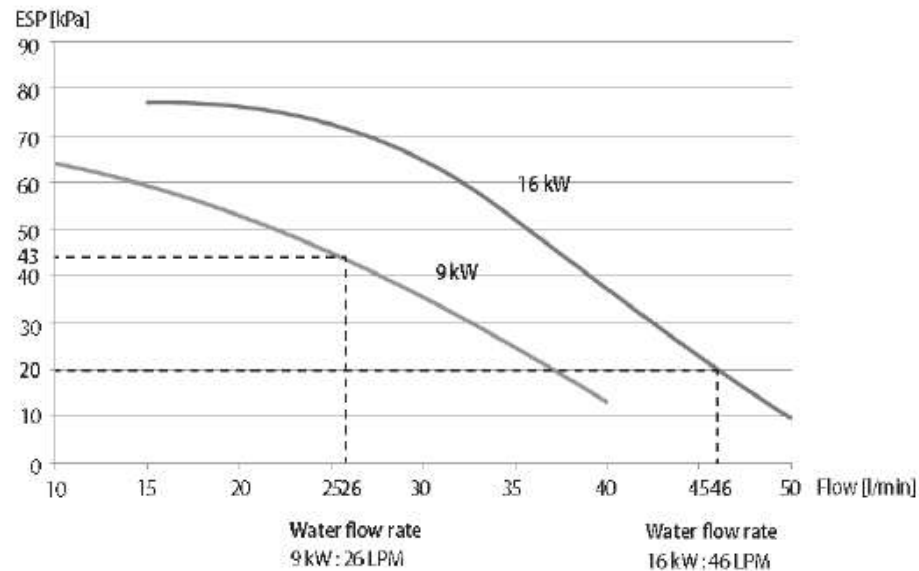

46 l/min (minimum 12 for flow switch)

20kPa ESP

6. Hydraulic Performance

6-1. Water Pump

1) ESP(External Static Pressure) Diagram

The illustration below shows the external static pressure of the unit depending on the water flow and the pump setting. If the pressure loss of total system is over 43(9 kW) or 20(16 kW)kPa, additional water pump should be installed in series. Otherwise, the flow rate might decreased, causing insufficient heating or cooling. When ESP is not enough, additional pump should be installed. In this case, install the PWM control external type pump additionally.

EHS 2020 Product Lineup - Highlights

- 1) Introduction of Tank Integrated Hydro Unit for TDM Plus R410A
- 2) Replacing Triangle RAC wall mount unit with Wind-Free Avant RAC for TDM Plus
- 3) Key features of R32 Split EHS heat pump (4-9kW) with or without integrated tank
- 4) Unique technology of R410A TDM+ EHS heat pumps (4-16kW)
- 5) Mono EHS heat pump for various installer friendly application

EHS 1) EHS 2020 Tank integrated Hydro Unit

Total Solution for Heating & DHW

Smooth Service via SD Card & Mobile App

200L & 260L

Pump for Climatehub

GRUNDFOS A/S

UPMM 25-95 130 (green line)

All ClimateHUB models SPLIT and MONO have the same water pump

Split 200L and 260L

Min water flow 7 L/min (0.42 m³/h),
max 48 L/min (2.88 m³/h)

Mono 200L 5kW;8kW

Min water flow 7 L/min (0.42 m³/h)

Mono 200L 12-16kW and 260L 8-16kW

Minimum water flow 12 L/min (0.72 m³/h)

Nominal water flows for each combination

SPLIT 200L tank and 260L tank (heating / cooling)

4kW: 12.7/14.4 L/min

6kW: 17.3/18.8 L/min

9kW: 26.0/25.1 L/min

MONO 200L tank and 260L tank (heating / cooling)

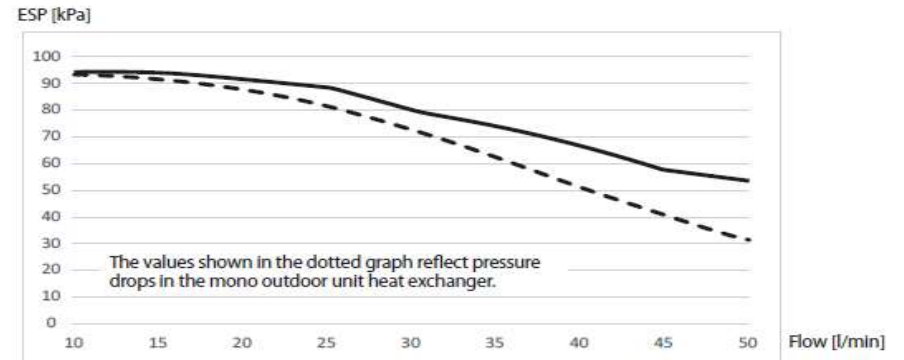

5kW: 14.4/14.4 L/min

8kW: 23.1/21.6 L/min

12kW: 34.6/34.6 L/min

16kW: 46.2/40.4 L/min

1) EHS 2020 Tank integrated Hydro Unit – electrical heaters

Integrated Back-up heater 2/6 kW (after heat exchanger)

*helps the heat pump during defrost or low ambient temperatures

Integrated Booster heater 3kW (inside the tank)

*enables the heat pump unit to heat DHW even when there is a malfunction on integrated pump for water circulation and for periodic disinfection (up to 70°C)

Details about setup of electric heaters are listed in Appendix 1 at the end of this document *EHS Field setting values for electric heaters*

Backup Heater Control logic (Generic)

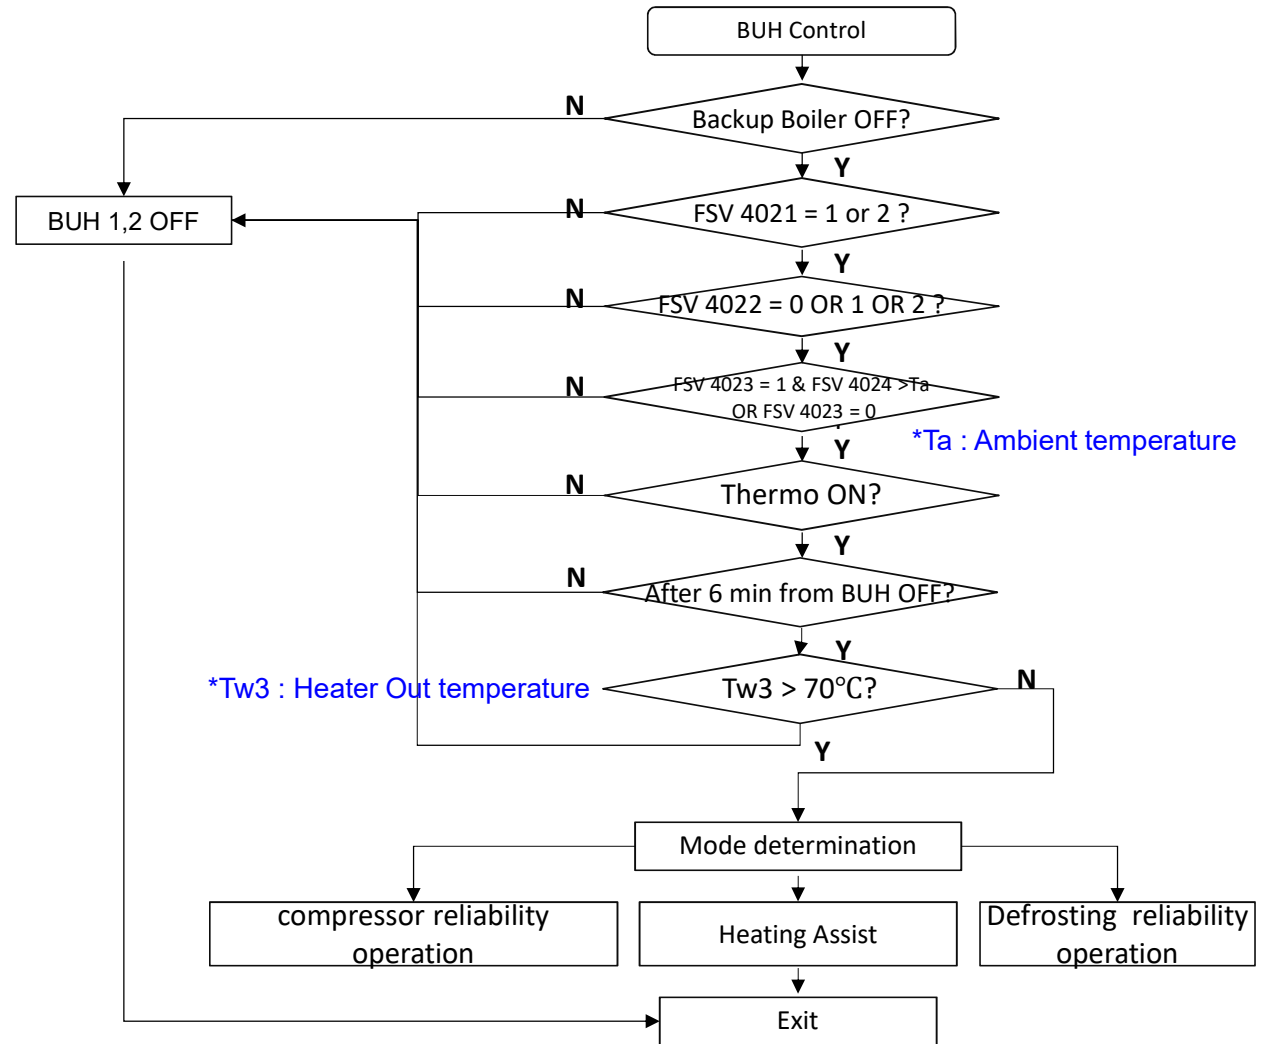

There are modes for backup heater operation. (defrost reliability, compressor operation reliability [heating mode], heating assist)

*FSV #4021(Default 0[NO])

*FSV #4022(Default 0 [BOTH] → wall-mounted type
Default 2 [BSH] → Tank integrated type)

*FSV #4023(Default 1[YES])

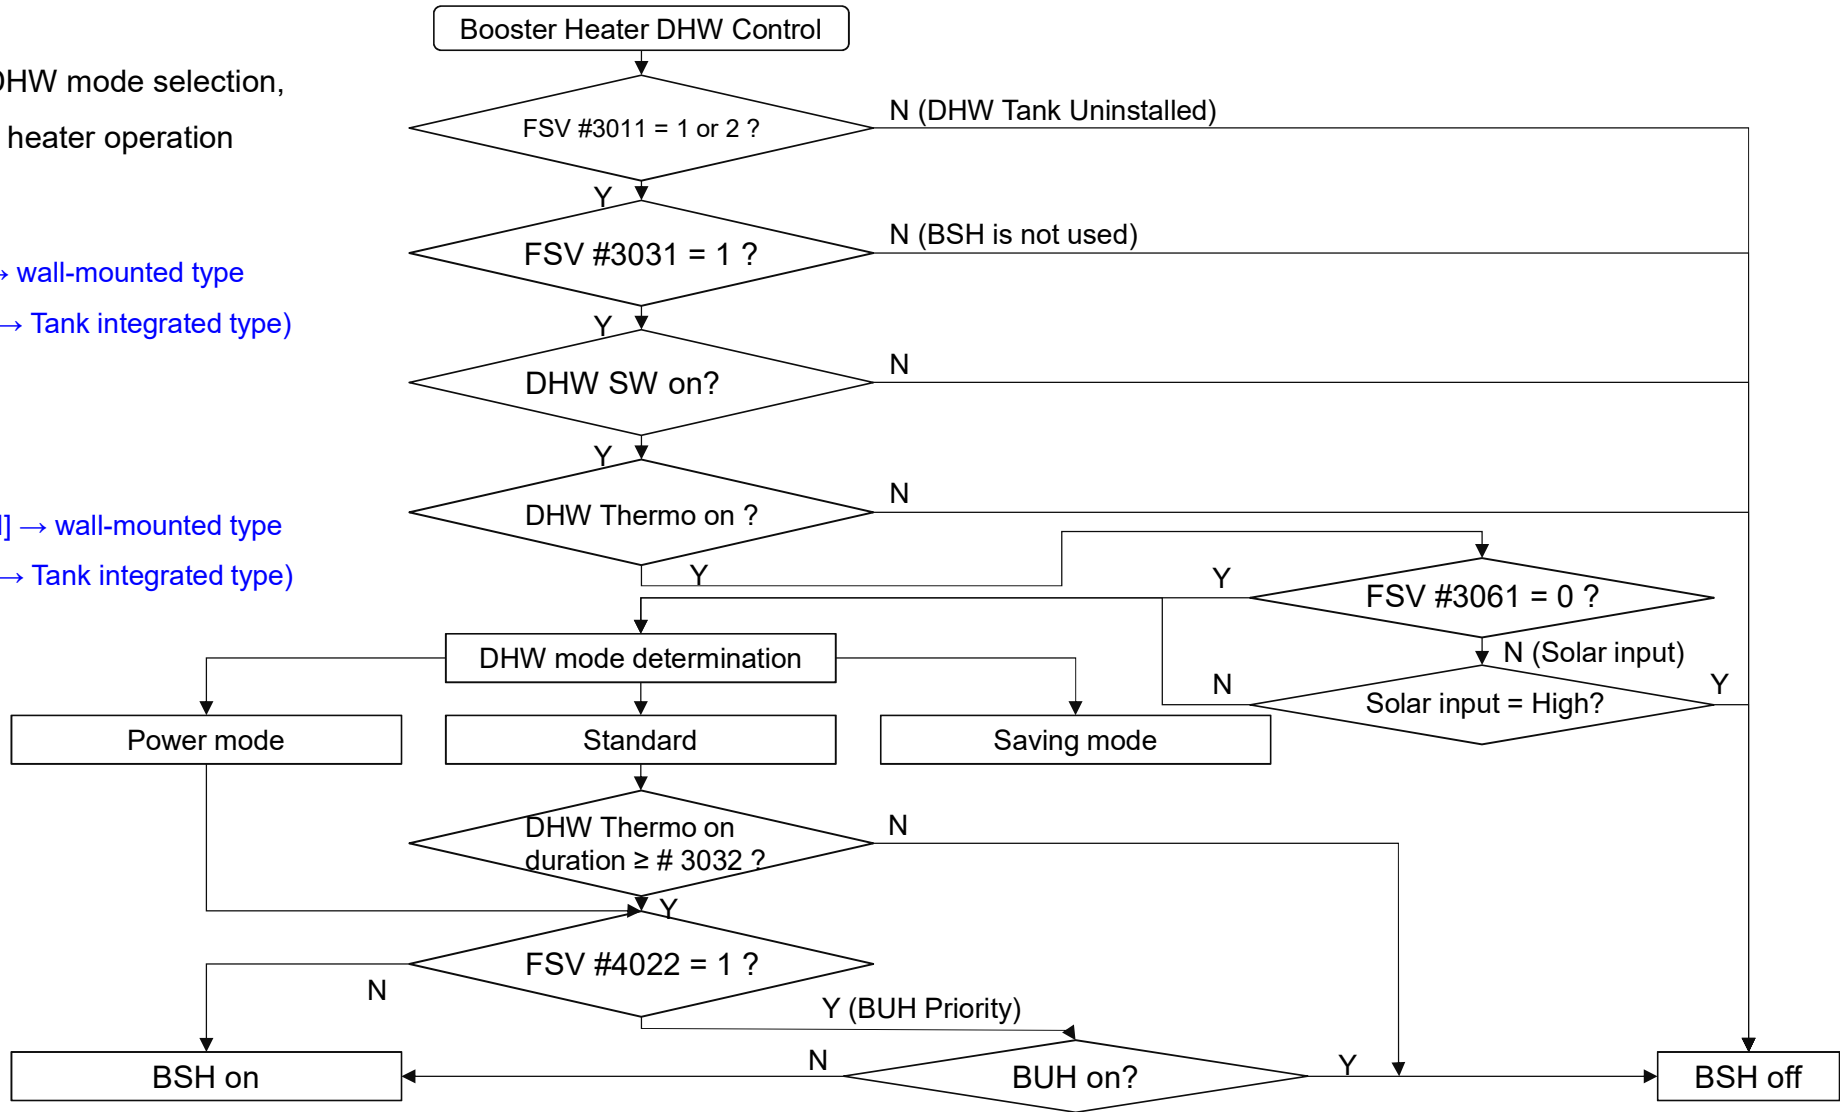

*FSV #4024(Default 0))

Booster Heater Control logic (DHW Tank)

According to the user's DHW mode selection, the delay time of booster heater operation changes or not.

- *FSV #3011(Default 0[NO] → wall-mounted type
Default 1[YES] → Tank integrated type)
- *FSV #3031(Default 1[YES])
- *FSV#3061(Default 0[NO])
- *FSV#3032(Default 20)
- *FSV#4022 (Default 0[BOTH] → wall-mounted type
Default 2[BSH] → Tank integrated type)

2) TDM+ Wall-Mounted Wind-Free Avant

'Designed by Thoughtfulness'

Wind-Free™ Cooling

- ✓ Disperses air through 23,000 micro holes to deliver comfortable cooling with capacities 2.2/2.8/3.6/5.6/7.1 kW

NASA communication protocol

- ✓ NASA communication system can connect wired remote controller, central control system

3) 2020 Key features of R32 Split EHS heat pump

a) Complete R32 Lineup - Mono 5-16kW, Split 4-9 kW, Wall-Mounted Hydro Unit, Tank Integrated Hydro Unit, Mono Control Kit

b) Top Class Energy Efficiency - Average SCOP for R32 lineup LWT 35°C/ 55°C is A+++ / A+++

c) 4-step Quiet Mode - Available in Split 6 kW & 9KW R32 model codes, sound pressure level can be set down to 35 dB(A) for quiet night operation

d) Compact Tank Integrated Hydro Unit - Available for Mono & Split & TDM+ ODU with 2 different options 200L & 260L up to 65°C * leaving water temperature. In case of ODU malfunction, continuous heating is guaranteed with integrated back-up (2, 4 or 6kW) and booster heater (3kW inside the tank)

e) User-friendly 2-zone controller with SmartThings - Controller enables users to manage different temperature settings per zone. The controller has thermometer integrated and also can be connected to 3rd party additional thermometer. Using the optional Wi-Fi Kit, the different aspects of the system can be controlled through the Samsung SmartThings App on your smartphone * *

a) Complete R32 Line up

**Properties of R32:**

Class: HFC

GWP: 675

ODP: 0

Critical temperature: **78.11°C***Safety group: **A2L****

Oil: POE

* critical temperature represents teoretical maximum temperature which can be present in refrigerant cycle

** safety group of A2L indicates mild flammability of R32 which is why this refrigerant has restrictions in use on bigger systems (refer to EN378 norm and Appendix 3 of the document [Flammability restrictions by EN378](#))

Since R32 is flammable, quantity of refrigerant charge is limited inside heating/cooling system (dependable on smallest indoor conditioned room). Because of that Samsung is keeping R410A heat pumps for larger systems (12-16kW) and for TDM+

b) Top Class Energy Efficiency

Two types of energy labels:

1. for heating and DHW (on the left)
2. for high and low temperature heating (on the right)

| Type | SPLIT R32 | | | MONO R32 | | | | |
|--------------|-----------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| | Capacity | 4 kW | 6 kW | 9 kW | 5 kW | 8 kW | 12 kW | 16 kW |
| SCOP | | 4.58 | 4.58 | 4.45 | 4.46 | 4.44 | 4.69 | 4.48 |
| Energy label | | A+++ | A+++ | A+++ | A+++ | A+++ | A+++ | A+++ |

c) 4-step Quiet Mode

Adjustable, 4-step, low-noise operation

Makes less noise when you need to, so it doesn't disturb you or your neighbors. The 4-Step Quiet Mode enables adjustable low-noise operation to meet strict sound level requirements*. Simply select from four different steps to reduce the sound level by 3dB, 5dB, 7dB* or keep it as low as 35dB(A)*.

*Based on internal testing of the 6kW and 9kW SPLIT outdoor units (AE060RXEDEG, AE090RXEDEG, AE090RXEDGG). The noise level is measured 3m away from the front of the outdoor unit, in an anechoic room with an outside temperature of 7°C. Results may vary depending on the model (capacity), environmental factors and individual use.

How to enter default (4th step) silent mode (*Priority : 1 > 2 > 3)

1. Enter quiet mode automatically by wired remote controller (schedule)

2. Enter quiet mode by signal of external contact

3. Enter quiet mode manually by wired remote controller

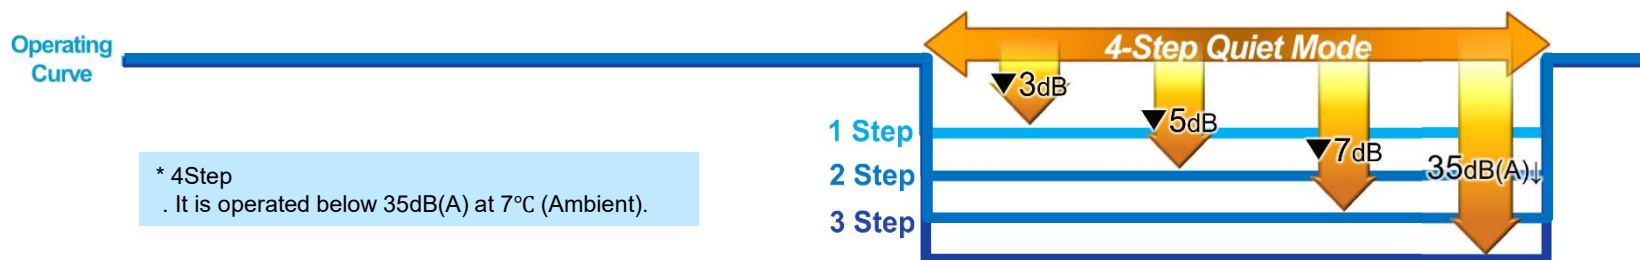

c) 4-step Quiet Mode - setup

- **Setting the option switch for function of low noise**

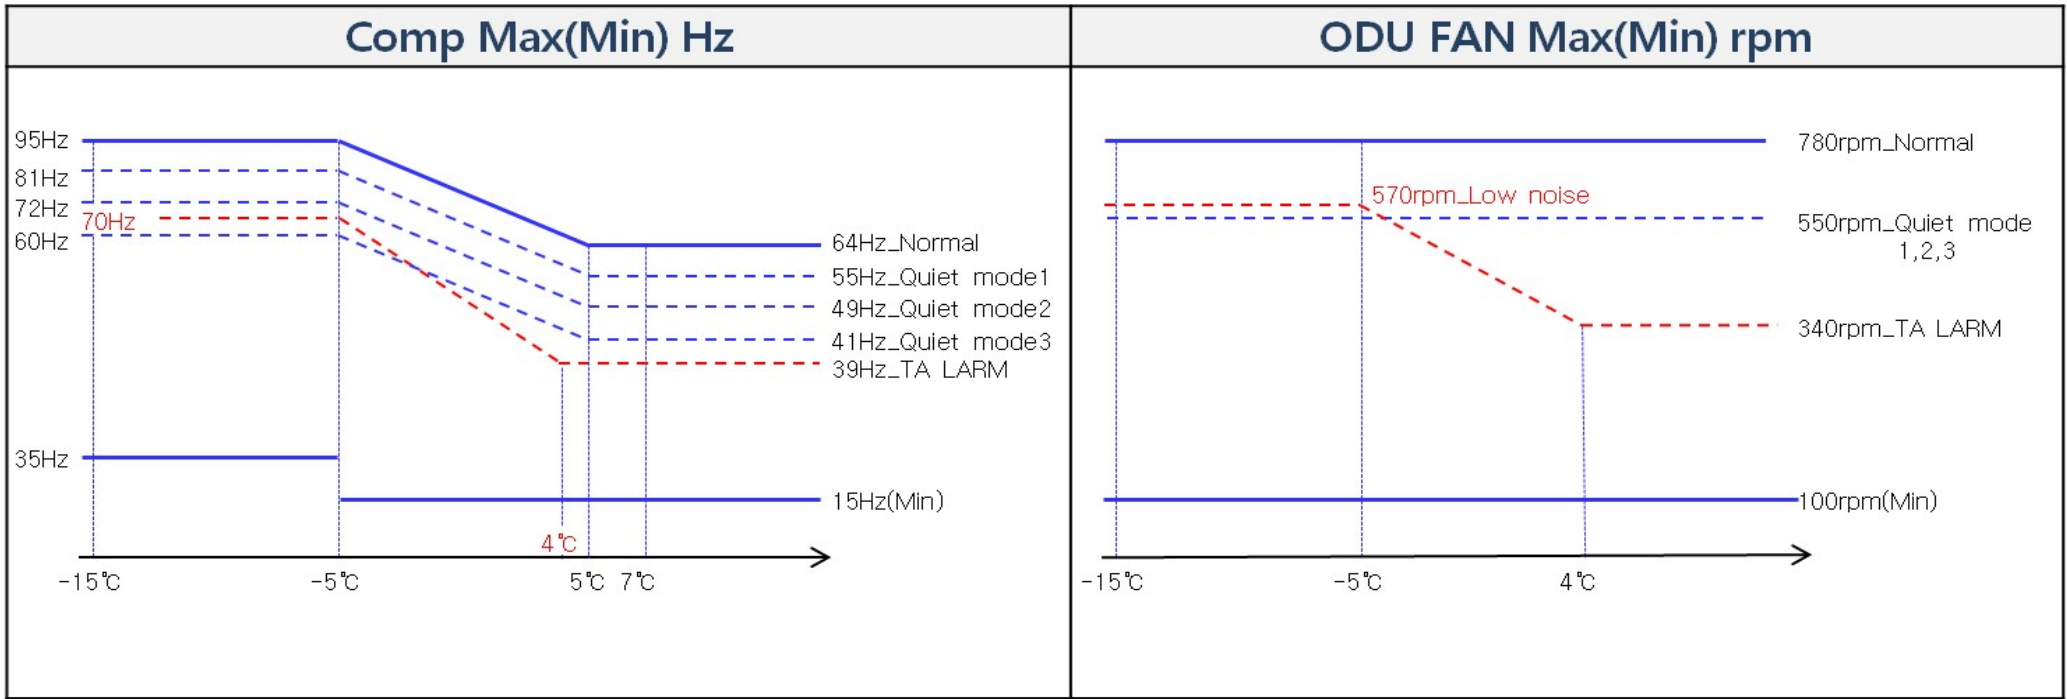

1. Press the K2 switch for 2 seconds, **only if compressor stop**.
2. Press the **K1** switch shortly to change the **option number** (SEG1, SEG2)
3. Press the **K2** switch shortly to change the **option value** (SEG3, SEG4)
4. Press the **K2** switch for **2 seconds to store** the changed option

| Option | Input unit | SEG1 | SEG2 | SEG3 | SEG4 | Function of the option |
|-------------|------------|------|------|------|------|-----------------------------------|
| Silent mode | Main | 0 | 4 | 0 | 0 | Manual Silent mode (-3 dB) |
| | | | | 0 | 1 | Manual Silent mode * 0.9 (-5 dB) |
| | | | | 0 | 2 | Manual Silent mode * 0.75 (-7 dB) |
| | | | | 0 | 3 | Manual Silent mode (-3 dB) |
| | | | | 0 | 4 | Low-noise Silent mode (default) |

c) 4-step Quiet Mode - properties

- Example of Operation Hz & RPM for Split 9kW quiet modes

d) Compact Tank Integrated Hydro Unit

R32

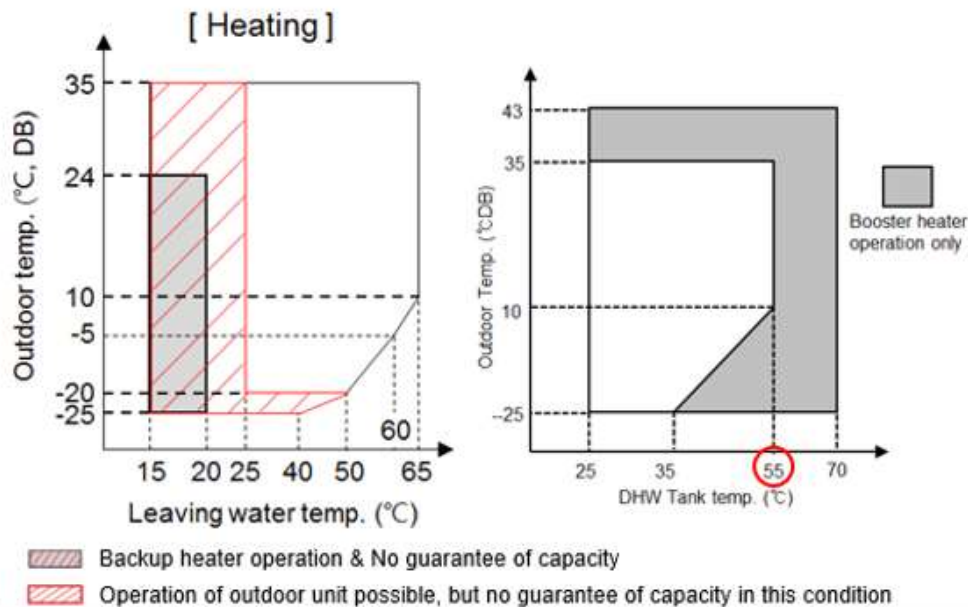

Max 65°C leaving water temp. by Heat pump

- 55°C → 65°C (ΔT : 10°C)

- Can reduce the use of heater to get a higher water temp.

(Use a heat pump instead of heater)

- **Max 70°C with heater. (Only DHW by BSH)**

Temperature graph:

- leaving temperature from heat pump and temperatures inside water tank strongly depend on outdoor temperatures that are below -10°C

- if temperatures are above -10°C, we have the following temperatures:

DHW temperature: **55°C**

Heating LWT: **65°C**

Advantages for tank integrated:

1. Backup heater 2-6kW
2. Booster heater 3kW
3. SmartThings WiFi connectivity
4. 260l biggest tank

e) User-friendly 2-zone controller with (Wi-Fi kit)

Convenient and intuitively easy control

New Wired Remote Control

Monitor and adjust the conditions in your home quickly and intuitively.

A new Wired Remote Control has a large and bright color display, touch control and a choice of languages*. It can be installed in your preferred location and allows you to use different temperature settings in each zone. **For controlling 2 zones**, we can use additional temperature sensor or additional controller

*EN (English)/DE (German)/FR (French)/IT (Italian)/ES (Spanish)/PL (Polish)

Remote control with a smartphone – requires Wi-Fi kit

Control your Samsung EHS on the go. Smart Connectivity lets you turn it on/off anytime and anywhere using the SmartThings App*. Thanks to the touch controller, you can control the mode and settings, schedule it to start/stop, monitor energy use, adjust summer time settings and identify errors.

Detail WiFi kit application and access to SmartThings features is presented in Appendix 2 of this document [Description of Wi-Fi kit: MIM-H04EN and SmartThings features](#)

Optional Wi-Fi Kit

* Available on iPhones and Android devices. A network connection is required. Samsung application account is necessary.

4) 2020 Unique technology of R410A TDM+ and Split EHS

a) Complete R410A Lineup - Split 12-16 kW, TDM+ 4-16kW, Wall-Mounted Hydro Unit, Tank Integrated Hydro Unit, wall mounted RAC, ducted and console units

b) Leading piping lengths - up to 70 meters pipe length when selecting TDM+ which can be mounted even in Split version with only hydro unit inside

c) TDM Plus - unique Samsung solution with hydro units plus indoor units (wall mount / ducted / console) all connected to one outdoor unit

d) Compact Tank Integrated Hydro Unit - Available for Mono & Split & TDM+ ODU with 2 different options 200L & 260L up to 55°C * leaving water temperature. In case of ODU malfunction, continuous heating is guaranteed with integrated back-up (2, 4 or 6kW) and booster heater (3kW inside the tank)

e) User-friendly 2-zone controller with SmartThings

- Controller enables users to manage different temperature settings per zone. The controller has thermometer integrated and also can be connected to 3rd party additional thermometer. Using the optional Wi-Fi Kit, the different aspects of the system can be controlled through the Samsung SmartThings App on your smartphone * *

* 55°C down to -10°C (max. 35°C down to -25°C)

** Available on iPhones and Android devices. A network connection is required. Samsung application account is necessary.

a) Complete R410A Line up

Properties of R410A:

- Class: HFC
- GWP: **2088****
- ODP: 0
- Critical temperature: **71.34°C***
- Safety group: A1
- Oil: POE

* critical temperature represents teoretical maximum temperature which can be present in refrigerant cycle

** Global warming potential of 2088 means this refrigerant will be banned in EU for small AC systems (less than 3kg) by Y2025

Since R32 is flammable, quantity of refrigerant charge is limited inside heating/cooling system (dependable on smallest indoor conditioned room). Because of that Samsung is keeping R410A heat pumps for larger systems (12-16kW) and for TDM+

b) Leading piping lengths

AE120/160MXTPH

Using only Y-joint

Using EEV kit

| Item | | Example | | Remarks |
|------------------------------------|----------------------------------|---|----------------|--|
| Maximum allowable length of pipe | Outdoor unit ~ Indoor units | Longest piping length | Less than 70m | $a+b+c+d+e \leq 70m$ |
| | | Equivalent length | Less than 85m | Y-joint and EEV kit : 0.5m |
| | | Total length | Less than 200m | $a+b+c+d+e+f+g+h+i \leq 200m$ |
| Maximum allowable height | Outdoor unit ~ Indoor units | Less than 30m | | H1 |
| | Indoor unit ~ Indoor unit | Height difference between indoor units | Less than 15m | H2 |
| Maximum allowable length of pipe | First Y-joint ~ Last indoor unit | Actual piping length | Less than 40m | $b+c+d+e \leq 40m$ (between first Y-joint and indoor unit) $h \leq 20m$ (between EEV kit and indoor unit) |
| Additional refrigerant calculation | | R=Basic Charge + Additional charge by the piping length + Additional charge by (A2A)Indoor Basic Charge : Up to 10m When Installing A2W only = 3500g Additional charge by the piping length : 3/8" - 60g/m, 1/4" - 20g/m Additional charge by (A2A)Indoor : Refer to the 113 page 'Amount of additional refrigerant for each indoor unit' table. | | |

Leading piping lengths for heat pumps:

Total piping lengths for models from 12kW and 16kW is up to 70 meters which can be beneficial when application is highrise building or apartment building.

This combination for TDM+ units can also be utilized only in split version of TDM+ by selecting only hydro unit and outdoor unit as combination

c) TDM Plus

TDM Plus

The TDM Plus system is an **'All-In-One'** Air-to-Water (A2W) and Air to-Air (A2A) system for a complete home climate solution.

It can be used throughout the year for cooling and heating to meet a variety of different user situations and needs. It enables underfloor heating/cooling and radiator heating, as well as offering air-to-air cooling/heating with various options for air conditioning (console, wall mount or ducted).

What is new for 2020?

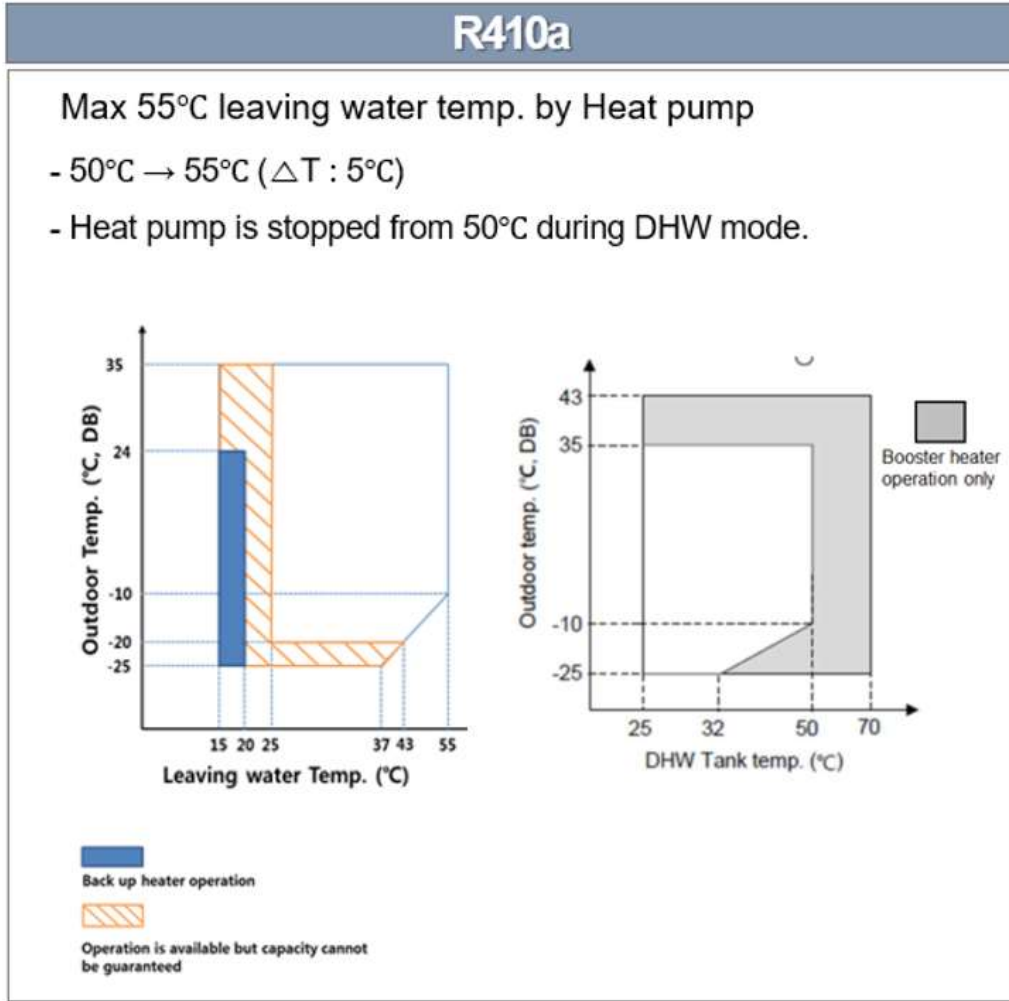

- 1- Tank Integrated Hydro Unit
- 2- Wall-mounted RAC **Wind-Free**

c) TDM Plus - Indoor Line up

| Capacity (kW) | | Picture | 2.2 | 2.8 | 3.6 | 5.6 | 7.1 | 9.0 | 16.0 | Model Code |
|-------------------------|---|---|-----|-----|-----|-----|-----|-----|------|----------------|
| Wall-Mounted Hydro Unit | 1-Phase |  | | | | | | ● | ● | AE***MNYDEH/EU |
| | 3-Phase | | | | | | | ● | ● | AE***MNYDGH/EU |
| Wall Mount RAC | A3050 (Good1) <small>*Without EEV</small> |  | ● | ● | ● | ● | ● | | | AE***MNADEH/EU |
| | NEW Wind-Free Avant QMD <small>*Without EEV</small> |  | ● | ● | ● | ● | ● | | | AE***TNXDEH/EU |
| Duct | Slim Duct |  | ● | ● | ● | ● | | | | AE***MNLDEH/EU |
| | MSP Duct (Duct S) |  | | | | | ● | ● | | AE***MNMPEH/EU |
| Console | Console |  | ● | ● | ● | ● | | | | AE***MNJDEH/EU |

* For units without EEV there is a need for external EEV kit which can be single or multiple.

d) Compact Tank Integrated Hydro Unit

Temperature graph:

- leaving temperature from heat pump and temperatures inside water tank strongly depend on outdoor temperatures that are below -10°C

- if temperatures are above -10°C , we have the following temperatures:

DHW temperature: 50°C
 Heating LWT: 55°C

Advantages for tank integrated:

1. Backup heater 2-6kW
2. Booster heater 3kW
3. SmartThings WiFi connectivity
4. 260l biggest tank

EHS 5) Mono EHS heat pump – installer friendly

In case of outdoor MONO heat pump selection (refrigerant is inside of outdoor unit) there is no limitations with placement of indoor units since water pipes connect indoor and outdoor unit. In this configuration Samsung line up of indoor equipment is:

- A. Control kit for connecting required signals to outdoor (has flow meter inside)
- B. Tank integrated indoor unit which has all necessary piping with pump and tank already mounted inside

Mono Control Kit

Size, mm (W x H x D)

290x 110x370

only for Mono

- New Color Wired Remocon
- 2 Zone Control, PV Enable, SG Ready
- New PBA
- Upgraded wire hole for R32

| | Capacity | Control Kit | Model code |
|-----|----------|-------------|------------|
| R32 | 5-16kW | ● | MIM-E03CN |

Size, mm (W x H x D)
595x 1800x 700

Tank integrated Hydro Unit

| | 1-Phase | 200L | 260L | Model code |
|-----|---------|------|------|-----------------|
| R32 | Mono | ● | ● | AE***RNWMEG/EU |
| | Split | ● | ● | AE***RNWSEG/EU |
| | 3-Phase | 200L | 260L | Model code |
| R32 | Mono | | ● | AE260RNWMGG/EU |
| | Split | | ● | AE260RNWSSGG/EU |
