Invitation to

WFEO Forum on Engineering Perspectives

Melbourne Convention Centre
23 November 2014

Engineers Australia is pleased to invite all National Member representatives of the World Federation of Engineering Organisations (WFEO) to attend the proposed WFEO forum on Engineering Perspectives to be held as part of the Engineers Australia National Convention 2014. This will be a pre-event to a successful World Engineering Congress (WEC) 2019 in Melbourne Australia.

This will be an opportunity for delegates representing the national members of WFEO to make presentations on various engineering perspectives relevant to their countries and to experience Melbourne and Australian engineering.

It is anticipated that the Forum will result in a declaration on the future direction of engineering especially in relation to some of the particular issues being faced by the engineering profession and the world today.

Attendance at the Forum will be at no cost to WFEO National Member Representatives. Unfortunately travel and accommodation costs cannot be covered. However Engineers Australia will facilitate visa requirements.

Background to the National Convention - 24-28 November 2014

“The Largest Engineering Event in the Southern Hemisphere”

- A meeting ground for the profession
- Exposure to thought leadership
- High quality technical and leadership content
- Leadership Conference 2014
- International keynotes
- 25 learned society groups will be holding technical meetings, workshops and seminars as part of the national convention
- 25 Engineers Australia groups and affiliate bodies aligned
- Over 3,000 delegates
- An exhibition featuring leading engineering companies
